Independent Electricity System Operator  
Market Rule Amendment

**Comments on MR-00425 - RT-GCG Cost Recovery Framework Amendment Proposal R00**

OPG appreciates the opportunity to submit comments on the Amendment Proposal R00 (version 6.0) for MR-00425 Real-Time Generation Cost Guarantee – Cost Recovery Framework.

While OPG has no comments on the rule language as published in the latest amendment package at this time, it believes that as this rule amendment has a material impact on market participants, the complete implementation details need to be determined before the rule amendment can be finalized. This would require the completion of one-on-one meetings with the affected entities and the determination of the pre-approved values that are critical to a fair outcome for RT-GCG market participants.
