

# Memorandum

To: Technical Panel  
From: Market Rules Group  
Date: August 8, 2017  
Re: MR-00432: Ancillary Services – Mandatory Requirements for Regulation Service Providers

Attached for Technical Panel review and consideration is market rule amendment proposal MR-00432-R00.

The IESO proposes amendments to the market rules to increase the transparency and consistency of performance requirements for all registered facilities providing regulation service. The proposed amendments will clarify that certain performance requirements – off-nominal frequency, speed/frequency regulation, and voltage ride through – apply to all regulation service providers, regardless of size, technology or connection location. In addition, the proposed amendments will clarify that telemetering requirements apply to all regulation providers regardless of connection location.

At its meeting on June 27, 2017, the Technical Panel determined that amendment submission MR-00432-Q00 warrants consideration and assigned a regular priority to developing the amendment proposal.

## **Panel Decision Required**

The IESO recommends the Technical Panel agree to post MR-00432-R00 for stakeholder comment for a period of two weeks, ending on August 31, 2017. The target for IESO Board consideration of the amendment proposal is October 25, 2017.
